

HOMWORK PROJECT

The Study of SHAPES PART 3 of 3 – BUILDING DESIGN

Your famous buildings are fabulous and they deserve to have more than just a little research done on them or a beautiful sketch drawn.

So for part 3 you are required to BUILD a 3D MODEL of your FAMOUS BUILDING!!!

Look carefully and study the shapes on your famous building. This will help you with building your structure. Remember it is a 3D model so you must consider what your building will look like from the front, side, back, top and bottom.

Types of things you could use to build your model:

Straws, pasta, ice pop sticks, toothpicks, cards, cardboard, newspaper, toilet rolls, Lego, pegs, pipe cleaners, modelling clay, recycled materials, etc.

To hold everything together you could use:

Sticky tape, blue tack, glue/hot glue, wire, string, etc.

This is a very exciting homework project and one that we hope you will enjoy! Ms Wu and Mr Hamence are looking forward to seeing your sensational models in 2 weeks' time.

FAMOUS BUILDINGS ARE DUE ON MONDAY, the 17^h of FEBRUARY, 2020

PROJECT PLANNING PAGE

Use this page to help you plan out your project.

Sketch out your plan here. You can label all the parts of your design with the different materials you want to use.

What materials will you be using?
