How much money did I spend altogether?

Money – finding change

When you buy something and you don't have the exact combination of notes and coins, you can pay with a larger amount and get the difference back. This is called change. If I paid for these flowers with \$20, my change would be \$8.

1 Find the change for each amount below. You could bridge to the next dollar and count on or use a written subtraction. Show all your workings:

a I had \$100. I spent \$68.

Change =

b I had \$50. I spent \$22.

Change =

c I had \$20. I spent \$16.50.

Change =

d I had \$120. I spent \$60.

Change =

e I had \$100. I spent \$75.

Change =

f I had \$50. I spent \$42.
